

Chudpaper

Abstract:

Chud Coin is a new ERC-20 token that aims to unite the virgins of the world and create a safe haven for crypto investors. Our goal is to provide the tools and resources needed to navigate the ever-changing and unpredictable world of crypto. Our team is composed of seven individuals with expertise in web development, contract development, app development, community management, marketing, exchange listing, and public relations. We plan on building a suite of products and resources to help users learn about crypto, stay informed, and make informed investment decisions. Our ultimate mission is to make sure every crypto user has the tools they need to survive and thrive in the wild wild west of crypto.

Introduction:

Chud Coin is a new ERC-20 token that was created during the bear market with one goal in mind: to unite all the virgins of the world and create a safe place for crypto investors. We believe that the safest developers are those that are virgins because they have all the time in the world to code and shit-post on Twitter. Our team is composed of eight individuals with expertise in various areas of crypto and technology. Together, we plan on building a suite of products and resources to help users learn about crypto, stay informed, and make informed investment decisions.

Tokenomics:

Chud Coin is a basic ERC-20 token with a total supply of (still secret) tokens. There are 0/0 taxes on every transaction made with the token. The contract will be renounced and the LP locked for 69.69 years on the day it launches on Uniswap.

Team:

Our team is composed of seven individuals with expertise in various areas of crypto and technology. We have web developer, contract developer, frontend dev, community manager, marketing manager, public relations manager, project advisor and our CEO Mr. Chud. Although we are an anonymous team, we are dedicated to building a suite of products and resources to help users learn about crypto, stay informed, and make informed investment decisions. Who knows we may all come out from beneath the shadows but for now who we are is not important. What we are trying to accomplish is of the utmost importance.

Products and Resources:

Our ultimate mission is to make sure every crypto user has the tools they need to survive and thrive in the wild wild west of crypto. To achieve this mission, we plan on building a suite of products and resources.

Crypto Education:

We believe that education is the key to success in the crypto world. That's why we plan on building a comprehensive crypto education program. Our platform will cover everything crypto related. We will also host seminars worldwide to educate and inform users about crypto. These tools will be available for free on our website. Premium users (Chud holders) will have access to more in depth information and resources.

Chudtools:

Chudtools is a suite of tools that will help users stay updated and help them educated decisions instead of guessing. Users will be able to see any chart on ETH and other major networks. We will also provide real-time price updates and market news. Be able to see what is trending organically and what is paid trending. Chudtools will also have alerts for big price changes on any of your favorite coins. Chudtools will be free to all users but will also have a premium version for a monthly fee. Holders of Chud will have access to all premium features.

Chudswap:

Chudswap is a decentralized exchange (DEX) that will allow users to trade their Chud Coin for other ERC-20 tokens. We plan on integrating Chudswap with Chudtools to provide users with real-time price updates and market news. We plan on integrating mev bot protection so that users can trade without fear of getting attacked by mev bots. This feature and others will only be available in the Pro version for a monthly fee. Chud token holders will have access Pro version tools.

ChudChange:

Our final goal is to have a fully licensed exchange where users can easily buy any crypto they want. We know this will take a lot of work, but we are prepared and excited to accomplish all our goals. Most exchanges charge a fee for every trade. Chud holders will benefit from having 0 fees on all transactions. Users who do not want to pay fees or hold Chud to get the 0 cost transactions will be able to pay a monthly rate depending on their activity and amount traded.

MrChud.com

MrChud.com is what we decided to name our website. We plan on making our site the number one crypto website globally. We plan on optimizing Google SEO to get the best results. MrChud.com will become a one-stop-shop for everything a crypto user can need. With the combination of the educational tutorials and guides, Chudtools, Chudswap and Chudchange (exchange) in one site we stand a good chance at making a top ranking crypto website.

Token Gated Community Chat

In today's fast-paced and ever-changing world of crypto, finding a safe space to discuss and learn about blockchain technology and cryptocurrencies can be challenging. Traditional chat groups, such as those found on Telegram or Discord, can be flooded with scammers, bots, and other unwanted elements, which can be frustrating and disheartening for new and seasoned users alike.

At Chud, we recognize the importance of providing a secure and welcoming environment for all crypto enthusiasts. That's why we are excited to announce the launch of our Token Gated Community Chat, a dedicated place that provides a safe and reliable space for members of our community to connect, engage, and explore the world of crypto.

Our community chat will be gated by Chud tokens (amount not decided yet) which will ensure that only verified holders are granted access. This is a significant step in protecting our community members from scams and fraudulent activities. Users can rest easy knowing that they are among like-minded individuals who are equally passionate and dedicated to learning about crypto and pushing the brand forward.

Our community chat will be available on the popular platform Discord (unless the community would prefer Telegram). Here, members can engage with one another and our team members, ask questions, share insights and ideas, and keep up-to-date with the latest trends and developments in the world of crypto.

We believe that the power of our community lies in its diversity, and therefore, we will also be creating public chat groups that will cater to specific interests, including topics such as DeFi, NFTs, and more. Members will be able to choose the public chat groups that they wish to join and participate in the conversations and activities that interest them the most.

Some users may not want to join a token gated community which is why we will also have a Public Discord chat and Telegram at the request of the community.

We understand that creating a safe and secure space for our community members requires diligence and active participation from all parties involved. Therefore, we will also be implementing various measures to ensure that our chat platform remains secure and free from unwanted elements. We will be regularly monitoring our chat groups to detect and remove any scammers or malicious actors.

In conclusion, our Token Gated Community Chat is a significant step forward for our community, providing a secure and welcoming space for members to connect, learn, and explore the world of crypto. We believe that this initiative will help foster a stronger, more engaged, and more informed community, leading to greater adoption and integration of blockchain technology and cryptocurrencies.

Conclusion

In conclusion, the Chud team is a group of highly motivated individuals with a passion for crypto and a mission to spread awareness and education about it. Our goal is to make crypto accessible to everyone, regardless of their technical expertise or financial means. We believe that by building high-quality products and resources, such as Chudtools and Chudswap, and hosting worldwide seminars, we can make a meaningful impact on the crypto community.

We recognize that the crypto industry is still in its early stages and that there are many challenges that lie ahead. However, we are confident in our ability to overcome these challenges and achieve our goals. With our diverse team of experts in web development, contract development, app development, community management, marketing, exchange listing, and public relations, we are well-positioned to make a difference in the industry.

We also understand the importance of security in the crypto industry. That is why we have taken extensive measures to ensure that our contract is secure and our LP is locked for 69.69 years. Our transparency and commitment to security are a testament to our dedication to the community.

We invite everyone to join us on this exciting journey and help us shape the future of crypto. Together, we can make Chud a success and create a brighter future for the entire industry. Thank you for taking the time to read our Chudpaper, and we look forward to your support.
